Description:

GNPGraystar's Tabular Alumina is the material of choice in high performance refractories. It can be used in many types of industries like ceramic, steel, glass, cement, foundry, petrochemical, and waste incineration.

Tabular Alumina is essentially a pure alumina exhibiting high density, low porosity, high mechnical strength, extreme hardness, inertness to chemical attack, and resistance to wear.

Applications:

GNPGraystar's Tabular Alumina is a raw material used in the manufacture of high alumina refractories, kiln furniture, electrical insulators, catalyst support media, investment casting, and more.
